Model:	CYO
---------------	-----

Material: Brass

Finish:

Chrome_00

With hot / cold marking

A line graph showing the relationship between flow rate (L/min) and pressure (bar) for the 1000 cc/min flow rate. The x-axis represents pressure in bar, ranging from 0 to 6. The y-axis represents flow rate in L/min, ranging from 0 to 5. The curve starts at (0,0), rises steeply to about 3.5 L/min at 1 bar, then more gradually to a peak of approximately 4.3 L/min between 2.5 and 3.5 bar. After this peak, the flow rate decreases to about 4.0 L/min at 4 bar and remains relatively stable, ending at approximately 3.9 L/min at 6 bar.

Pressure (bar)	Flow Rate (L/min)
0	0.0
0.5	2.5
1.0	3.5
1.5	3.8
2.0	4.1
2.5	4.3
3.0	4.3
3.5	4.3
4.0	4.0
4.5	4.0
5.0	4.0
5.5	3.9
6.0	3.9
